General Managers  
Hongkong, 6th January, 1890.

about the project, popular report has it that the survey and professions made were only pretence to favour or over-represented, and so, as the people have made up their minds that nothing is to be done, in their present state of excitement the natives are not inclined to be reasonable, but it must be said in justice to the Governor, that he should be allowed more time before concluding that he intends to persevere in the old line and treat this portion of his jurisdiction as a hostile territory.

The real truth of the feeling against taxation, however, is that since the Governor has taken over charge, he has done nothing whatever down here, that can directly or indirectly show how money locally contributed is used, so the people, seeing all funds transported north, and only seeing of things effected up there, which, by the way, are reported as being for the better, or for the worse, of no general, peaceful benefit, have no reason to believe that money collected is certainly passing in directions opposite to the public interests and well.

As far as the safety of foreigners is concerned in all this, there is no reason to be alarmed, or to keep out of it, there does not seem to be much cause for anxiety for the people have made no change in their friendly feeling and bearing towards Western people, but for more than a year long at Amoy and being pointed out as these intended for the Takow line, we see no nearer the desired end than ever. Another rumor—report—is current, (as I am told), viz:—H. H. the Governor intends either himself setting up, or letting a foreigner set up, a telephone service between Taiwan, Takow, and the principal places in the island. This is a very great boon and should prove highly commendable to the promoters. Thus far, we have seen nothing to justify the rumor, but still in this place one has to be thankful for small mercies, and little hopes!

By the way, in these times of anti-landlordism, it may interest you to know that some of the land here is held by peasant tenants who pay an annual rent of about 10 per cent. of the produce. This payment is made in produce, the sale of which, as also the payment of all taxes, the landlord has to look after.
